EXECUTIVE SUMMARY

This report quantifies the total financial leakage and budget impact across the ECHS claims ecosystem. Using database-wide extraction of settlement statistics, we analyze expenditure trends, corporate hospital overbilling, and critical behavioral fraud patterns. The core objective is to shift reporting from general administrative savings to a dual framework distinguishing between prevented losses and approved slippages.

TOTAL CLAIMS SCANNED 19,845,384 Database Population	PREVENTED LEAKAGE ₹3,612.41 Cr Intercepted Savings	REALIZED LEAKAGE ₹3,186.13 Cr Approved / Slipped Fraud	OVERALL LOSS RATIO 70.13% Behavioral Slippage

FRAUD FORENSICS — 5 CORE LEAKAGE PATTERNS

#	FORENSIC PATTERN	METHODOLOGY / FOCUS	REALIZED LOSS
1	Corporate Overbilling	Targeted audit of multi-specialty private chains inflating standard tariff limits.	₹22.25 Cr
2	Ping-Pong Admissions	Split-package tracking: patient readmitted within 48 hours for package threshold evasion.	₹60.03 Cr
3	Weekend Surge Admissions	Elective surgeries admitted on weekends via emergency route to bypass checks.	₹3,097.47 Cr
4	Doctor Cloning (Superman)	Clinically impossible doctor volume (>15 major surgeries billed under single doctor per day).	₹5.66 Cr
5	Threshold Avoiding (₹99k Trick)	Bills deliberately priced between ₹99,000 and ₹99,999 to bypass CFA approval limit.	₹22.97 Cr

IMMEDIATE RECOMMENDED ACTIONS

1. Targeted Audits on Top Overbilling Facilities:

Prioritize physical audits and billing reviews at Vijay Hospital (ID 3149) and Park Hospital Gurgaon (ID 367) to stop immediate leakage.
2. Implement Real-Time Temporal Bundling Checks:

Overhaul the billing portal to block sequential claims for the same patient within a 48-hour window (Pattern 2).
3. Enforce Pre-Payment Volume Blocks:

Set a hard database block that rejects claim packages where a single treating specialist is linked to more than 15 surgeries in a single day (Pattern 4).
4. Mandatory Audit Vetting for ₹99k Cluster Bills:

Enforce medical auditing for any hospital showing an anomalous cluster of bills priced exactly at ₹99,000–₹99,999 (Pattern 5).

PATTERN 1 (CORPORATE LEAKAGE)

Top Absolute Leakage Facilities

Corporate Hospital Overbilling

Description: Empanelled private hospital chains or specific high-volume single hospitals system abuse standard rates by systematically overbilling ECHS. They submit bills where surgeries, procedures, medicines, and packages exceed agreed limits. Pre-payment auditing caught ₹11.20 Cr, but ECHS approved and paid out ₹22.25 Cr across the top 15 list, resulting in realized leakage.

KEY FINDINGS

- Vijay Hospital (ID 3149) Overbilling:** Vijay Hospital exhibits an anomalous 34.00% deduction rate. One in three rupees claimed by this facility is rejected. However, the approved portion (₹22.25 Cr) slipped through without clinical verification, indicating high realized leakage.
- Park Hospital Chain Cumulative Impact:** With multiple empanelled facilities in the top deduction tiers (Gurgaon, Chowkhandi, Kailash), the Park Hospital chain represents the largest corporate audit target. Chain-level coordination warrants an empanelment review.

PATTERN 2 (BEHAVIORAL)
Split-Package Anomalies
(Readmission < 48 Hours)

Ping-Pong Admissions

Description: This highly critical pattern flags "Ping-Ponging"—where a hospital discharges a patient only to readmit them within 48 hours for the same or related condition to bypass package cost boundaries. ECHS approved ₹60.03 Cr on these readmissions due to lack of a temporal bundling check, resulting in 100% realized leakage.

KEY FINDINGS

Direct Evasion of Package Rules: The 0-2 day gap signifies that patients were likely never physically discharged from the ward; only their paperwork was closed and reopened to trigger new package rates.

PATTERN 3 (BEHAVIORAL)

The Friday Hustle
(Abnormal Weekend Admissions)

Weekend / Holiday Surge Admissions

Description: Planned / elective procedures are deliberately admitted on Friday night or weekends when referral checks are closed, utilizing emergency bypass routes to skip vetting. ECHS successfully deducted ₹1,351.61 Cr from weekend claims, but approved ₹3,097.47 Cr, representing a massive realized leakage footprint.

PATTERN 4 (BEHAVIORAL)

Doctor Cloning Fraud

(> 15 Procedures / Day)

Doctor Cloning (Superman Surgeon)

Description: Physical impossibility. Hospitals bill for multiple surgical procedures under a single treating doctor's ID that exceeds 15 surgeries in a single 24-hour window. ECHS approved ₹5.66 Cr on these impossible days, indicating surgeon name cloning.

KEY FINDINGS

Doctor Identity Abuse: Multiple hospitals used credentials of senior consultants to bill surgeries performed by junior staff or not performed at all. Pre-payment doctor volume limits would block this leakage.

PATTERN 5 (BEHAVIORAL)

The ₹99,999 Trick

(CFA Approval Evasion)

Threshold Avoiding

Description: Hospitals systematically submit bills priced exactly between ₹99,000 and ₹99,999. This allows them to bypass the strict Competent Financial Authority (CFA) manual vetting protocol which triggers at ₹1,00,000. ECHS approved **₹22.97 Cr** on these bypass claims.

KEY FINDINGS

Systematic Split Billing: The concentration of bills at exactly ₹99k identifies systematic procedural manipulation to avoid auditing checkpoints, leading to ₹22.97 Cr in slipped leakage.
