EXECUTIVE SUMMARY

Context: Module 19 executes a deep-dive forensic analysis targeting systemic hospital-driven fraud. It focuses on intentional bypasses of CGHS package limits, abuse of entitlements, ghost billing, and exploitation of administrative blind spots.

This report extracts exact claim-level evidence, bypassing summary layers to identify the root culprits operating these fraudulent schemes.

TOTAL CLAIMS SCANNED 43,000,000 database population	TOTAL FRAUD MARKERS 40,959,646 anomalies flagged	LEAKAGE IDENTIFIED ₹27,403.47 Cr monetary exposure
--	---	---

IMMEDIATE RECOMMENDED ACTIONS

- 1. Targeted Audits on "Ghost" & "U-Flag" Claims:** Massive leakage is occurring outside the bounds of traceable hospital IDs. A complete system-freeze on Unverified (U-Flag) claim processing is required.
- 2. Crackdown on Elite Non-Empanelled Funnels (Y-Flag):** Strictly enforce Pre-Authorization for all Y-Flag claims to stop standard elective procedures from being routed to expensive elite hospitals.
- 3. Deploy Pre-Payment Interception Models:** Implement AI-assisted interception rules targeting NMI (Unlisted) Loophole and Emergency Gateway Bypasses before payment is released.

PATTERN 1 (CORPORATE LEAKAGE)

Systemic Extreme Overbilling

HIGH DEDUCTION HOSPITALS

Description: Hospitals submitting massively inflated claims resulting in extreme deduction percentages (>50%). This highlights systemic, intentional upcoding across all patient types.

Key Findings

Systemic Upcoding: The consistent >50% deduction rate among these top hospitals signifies a structural billing strategy designed to extract maximum ECHS funds regardless of clinical necessity.

System Exposure: A total of **2,250,722 claims** were flagged under this specific pattern of abuse.

PATTERN 2 (ENTITLEMENT ABUSE)

Private Ward Irregularities

ROOM UPGRADE FRAUD

Description: Hospitals illegally upgrading patients from General/Semi-Private rooms to Private rooms against their strict card entitlements to inflate daily room rent.

Key Findings

- Intentional Misclassification:** Volume of claims highlights that patient class upgrades are not clinical exceptions, but an automated billing practice by these hospitals.
- System Exposure:** A total of **14,727 claims** were flagged under this pattern.

PATTERN 3 (CRITICAL FRAUD)

No Traceable Hospital

GHOST ADMISSIONS EXPOSURE

Description: The most severe structural failure. Massive volume of claims processed without any traceable Hospital ID, completely hiding the source of the billing from standard audits.

Key Findings

- Data Capture Failure:

The existence of millions of ghost claims points to severe validation loopholes in the primary claim submission portal.
- System Exposure:

A staggering **21,574,498 ghost claims** exist in the RAW data, requiring immediate IT intervention.

PATTERN 4 (BYPASS MECHANISM)

Elite Hospital Funneling

Y-FLAG BYPASS

Key Findings

- Routine Care Exploitation:** High volume of Y-Flag usage indicates that it is not reserved for genuine life-threatening emergencies, but used as a standard route for elective care at premium rates.
- System Exposure:** A total of **3,260,758 claims** bypassed standard empanelment utilizing this flag.

PATTERN 5 (VERIFICATION FAILURE)

Key Findings

- Gateway Exploitation:** The massive volume of E-Flag (Emergency) claims clearly shows hospitals are weaponizing the 'Emergency' classification as a primary acquisition channel rather than an exception.
- System Exposure:** A staggering **7,827,563 emergency bypass claims** were detected across the database.

EXECUTIVE POLICY INTERVENTIONS

1. Pre-Payment Interception Deployment

CRITICAL

Mandate the deployment of AI-assisted billing interception to flag Emergency Bypass and Ghost Claims. Catching these claims *before* payment generation represents an immediate verifiable savings potential.

2. Mandatory UID Tracking for Hospitals

CRITICAL

Address the 21 Million "Ghost Claims" immediately by enforcing strict validation layers in the BPA portal. Any claim submitted without a registered Hospital ID must be hard-rejected.
