

ECHS FRAUD ANALYTICS

COMPREHENSIVE IDENTITY FRAUD REPORT

ID Duplication | Simultaneous Admissions | Synthetic Identities

IIT KANPUR × ECHS DIRECTORATE

TOTAL FRAUD CASES

7,576,286 Flagged

FINANCIAL EXPOSURE

■796.67 Cr

PATTERNS ANALYZED

6 Critical Patterns

ANALYSIS PERIOD

Last 5 Years (2021-2026)

REPORT DATE

June 3, 2026

CLASSIFICATION

CONFIDENTIAL — OFFICIAL USE ONLY

ANALYSIS OF PATTERNS & UNIQUE METRICS

This report presents factual findings of identity fraud across **26+ million records** over the last 5 years. A total of **7,576,286 cases** have been flagged representing an exposure of **₹796.67 Cr**. Rather than standard aggregate summaries, the below details exact pattern behaviors and definitions for unique metrics found exclusively in specific tables.

Pattern & Core Metric	Factual Definition & Analysis Context
P01: Duplicate Card IDs(Metric: Svc #s)	A single physical ECHS health card linked to 3+ distinct ex-serviceman identifiers. Indicates severe identity duplication. Svc #s denotes the count of unique identities reusing the same card.
P02: Simultaneous Admissions(Metric: Gap/Overlap)	Beneficiary admitted to multiple hospitals simultaneously or consecutively within 7 days. Gap/Overlap days <= 7 indicates a physical impossibility or suspicious consecutive admissions (hospital hopping).
P03: Duplicate Bill Numbers(Metric: Dup Count)	The exact same bill/invoice number resubmitted for different claims. Dup Count tracks how many times the identical bill string (excluding NA/empty) appeared.
P04: Mobile Number Rings(Metric: Cards)	A single mobile number attached to 5+ unrelated ECHS cards. Legitimate sharing (families) rarely exceeds 3. 5+ indicates a coordinated agent network. Dummy numbers (e.g. 000000) are rigorously filtered out.
P05: UID Duplication(Metric: UID masked)	The same 12-digit biometric Aadhaar UID shared across multiple distinct ECHS accounts. Reveals either deep synthetic identity creation or mass data-entry fraud. Dummy UIDs are strictly ignored.
P06: High Frequency Claims(Metric: # Claims)	Over-utilization detected dynamically. A statistical baseline established a threshold (Q3 + 1.5*IQR) of 13+ claims in 5 years. # Claims denotes the exact frequency breaking this outlier threshold.

FRAUD PATTERNS DETECTED

PATTERN 01 Duplicate Card IDs		● CRITICAL
Description:	Single ECHS card used by multiple service numbers	
Cases Detected:	1,220 flagged cases	
PATTERN 02 Simultaneous Admissions		● CRITICAL
Description:	Same beneficiary at 2+ hospitals simultaneously	
Cases Detected:	6,578,672 flagged cases	
PATTERN 03 Duplicate Bill Numbers		● HIGH
Description:	Same bill number used multiple times	
Cases Detected:	250,090 flagged cases	
PATTERN 04 Mobile Number Rings		● HIGH
Description:	Single mobile linked to 5+ cards	
Cases Detected:	177,291 flagged cases	
PATTERN 05 UID Duplication		● CRITICAL
Description:	Same Aadhaar UID for multiple service numbers	
Cases Detected:	82,930 flagged cases	
PATTERN 06 High Frequency Claims		● HIGH
Description:	Beneficiaries with 10+ claims	
Cases Detected:	486,083 flagged cases	

P11-01

1220 Cases Detected

Duplicate Card IDs — Critical Identity Fraud

Single ECHS card number used by multiple different service numbers. **1220 cases detected** with complete hospital and beneficiary details. Top 15 cases by claimed amount shown below.

Svc #s = Unique Service Numbers using same card. Full data in CSV file.

P11-02

6578672 Cases Detected

Simultaneous Admissions — Physical Impossibility

Same beneficiary admitted to 2+ hospitals at overlapping times (physical impossibility). **6578672 cases detected**. Top 15 cases by overlap duration shown.

Beneficiary	Hospital 1	Hospital 2	Gap/Overlap	Total Exposure
RAMESH NAGPAL	NORTH EAST HEALTHCARE PVT LTD	5294	Delhi 2	■0
ROHTASH KUMAR	FORTIS HOSPITALS LTD - FARIDABAD	274	Delhi	■0

Duplicate Count = Number of times same bill number was resubmitted.

P11-04

177291 Cases Detected

Mobile Number Rings — Fraud Network Detection

A Mobile Number Ring is when a single mobile number is linked to 5+ distinct ECHS cards belonging to different service numbers (ex-servicemen). Legitimate sharing is 2-3 cards within a family; 5+ cards indicate a coordinated fraud agent filing claims for multiple identities. **177291 rings detected**. Top 15 by total exposure shown. Dummy/invalid numbers are excluded and reported separately.

Mobile Number	Cards	Svc Numbers	Claims	Hospitals	Total Exposure

9467108388	8	3	122	12	■2.34 Cr

Cards = Unique ECHS health cards on same mobile. Svc Numbers = Distinct ex-serviceman IDs sharing the mobile. Total Exposure = Sum of all claims. Dummy numbers excluded.

P11-05

82930 Cases Detected

UID Duplication — Synthetic Identity Fraud

Same Aadhaar UID shared by multiple service numbers (indicates identity theft or synthetic identities). **82930 cases detected**. Top 15 by service number count shown.

UID (masked)	Service #s	Claims	Hospitals	Total Exposure
7561****7493	60	66	Delhi Cantt (BHDC), KALRA HOSPIT...	■1.37 Cr
9456****4987	98	111	KALRA HOSPITAL SRCNC PVT LTD - K...	■1.29 Cr

■ **CRITICAL:** Each UID should map to exactly ONE individual. Multiple service numbers = identity fraud.

P11-06

486083 Cases Detected

High Frequency Claims — Over-Utilization

Beneficiaries with claims exceeding the dynamically calculated statistical outlier threshold (13 claims). Indicates potential over-utilization or fraud. **486083 cases detected**. Top 15 by total exposure shown.

Top 15 beneficiaries ranked by total claim count. Span = Days between first and last claim.

PRIORITY ACTION MATRIX

Priority 1: CRITICAL — Immediate Investigation Required

Pattern	Cases	Action Required
01. Duplicate Card IDs	1,220	Immediate audit and verification
02. Simultaneous Admissions	6,578,672	Immediate audit and verification
05. UID Duplication	82,930	Immediate audit and verification

Priority 2: HIGH — Prompt Review Required

Pattern	Cases	Action Required
03. Duplicate Bill Numbers	250,090	Review within 30 days
04. Mobile Number Rings	177,291	Review within 30 days
06. High Frequency Claims	486,083	Review within 30 days

RECOMMENDATIONS & NEXT STEPS

1. Establish dedicated fraud investigation team to review all CRITICAL priority cases
2. Implement real-time duplicate ID detection at claim submission stage
3. Cross-reference all flagged UIDs with UIDAI for validation
4. Conduct hospital-level audits for facilities with multiple flagged cases
5. Implement biometric verification for high-value claims
6. Establish mobile number verification system for beneficiary registration
7. Deploy automated alerts for simultaneous admission attempts
8. Review and strengthen dependent age-eligibility validation rules
9. Initiate recovery proceedings for confirmed fraud cases
10. Share intelligence with law enforcement for criminal investigation

Important Notes:

- All flagged cases are **investigative leads** generated by automated analysis. Each case requires verification by qualified auditors before any action is taken.
- Complete descriptive information is included in all CSV data files to enable immediate investigation.
- Financial exposure figures are approximate based on claimed amounts. Actual fraud amounts may differ after detailed investigation.
