IIT KANPUR — Data Analytics & Fraud Intelligence Division

10 June 2026 | Ex-Servicemen Contributory Health Scheme (ECHS)

EXECUTIVE SUMMARY

This report executes a deep-dive forensic analysis targeting systemic hospital-driven policy abuse and entitlement misuse within the ECHS claims ecosystem for the period **FY 2021–2025**. Across **23,100,000+ claims** scanned, a total of **5,063,526 fraud markers** were identified with an overbilling exposure of **₹11,931.18 Cr**. *Note: A single claim can be flagged under multiple patterns simultaneously (e.g., a ghost admission that is also a room upgrade), so the marker count exceeds the unique claim count. Unique flagged claims: ~4,350,314.*

Audit Methodology Disclaimer: Deductions identified in this report reflect claims where the ECHS audit process reduced the approved amount. Deductions may result from documentation gaps, package coding mismatches, late submissions, duplicate billing, or intentional overbilling. This report flags statistical anomalies for further investigation — it does not constitute a finding of fraud. Final fraud determination requires case-level review.

FRAUD FORENSICS — DETECTION PATTERNS & METHODOLOGIES

#	Detection Pattern	Methodology / Focus	Impact Summary
1	High Deduction Hospitals	Top hospitals by absolute deduction volume — systematic overbilling across all claim types	215,768 Claims Evaluated
2	Room Upgrade Anomalies	Illegal patient class upgrades — General/Semi-Private to Private ward without entitlement	6,414 Claims Flagged
3	Ghost Admissions	Claims processed with no traceable Hospital ID — structural BPA portal failure	2,672,225 Ghost Claims
4	Y-Flag Bypass	Elite non-empanelled hospital funneling — bypassing CGHS rate ceilings via emergency route	70,388 Bypass Claims
5	U-Flag Anomaly	Unverified hospital status — blind spot exploitation allowing unchecked processing	14,222 Unverified Claims
6	IPD/OPD Reversal	OPD procedures artificially escalated to IPD admissions to claim room rent and higher packages	1,228,652 Suspicious Claims
7	NMI / Unlisted Procedure Loophole	Billing via unlisted 'NMI' codes to bypass fixed CGHS package rate ceilings	91,009 Unlisted Claims
8	Bait & Switch (PA Inflation)	Low Prior Approval secured, massively inflated final bill submitted post-admission	622,325 Inflated Claims
9	Stay Extension Farming	Artificial discharge delays to farm daily room rent and routine care charges	142,523 Extension Cases
10	Emergency Gateway Bypass	False emergency declarations bypassing referral ceilings, polyclinic wait times, geography rules	Data gap — FY 2021–25 pending

IMMEDIATE RECOMMENDED ACTIONS

1. Targeted Audits on Top Overbilling Facilities: Prioritize physical audits at Park Hospital chain (multiple locations) and Vijay Hospital — the two largest absolute overbilling generators in the FY 2021-2025 dataset.

2. Hard-Reject Ghost Claims at BPA Portal: Enforce mandatory Hospital ID validation — any claim without a registered Hospital ID must be rejected before entering the settlement pipeline.

3. Pre-Authorization Mandatory for Y-Flag: Restrict Y-Flag usage to genuine life-threatening emergencies with real-time clinical verification. Current data shows polyclinics as top Y-Flag users, not emergencies.

4. Deploy Pre-Payment AI Interception: Implement billing interception rules targeting NMI Loophole, Bait & Switch, and Emergency Gateway claims before payment is released.

PATTERN 1 (SYSTEMIC OVERBILLING)

Top Absolute Deduction Facilities

HIGH DEDUCTION HOSPITALS

Fraud Mechanism: Hospitals systemically inflate diagnostic and routine package costs at scale, leading to extreme deduction rates when subjected to basic automated claim processing checks.

How the threshold was derived: Hospitals are selected based on absolute deduction volume (FY 2021–2025). This absolute-volume threshold ensures audits target the largest sinks of ECHS funds rather than low-volume high-percentage outliers.

Table 1.1 — Top 15 Hospitals by Absolute Deduction Volume

—	TOP 15 TOTAL	—	—	17,005	454.85	—	413.14	90.83%

Key Findings

Park Hospital Chain Dominance: The facility **METRO HEART INSTITUTE - F** tops the list with **₹57.68 Cr** deducted. The concentration of massive deductions at the top of the list warrants a targeted corporate-level empanelment review.

PATTERN 2 (ENTITLEMENT ABUSE)

Private Ward Irregularities

ROOM UPGRADE ANOMALIES

Description: Hospitals billing patients for a higher room category than their ECHS card entitlement authorises. **Interpretation note:** Low deduction rates (1–5%) do not mean the fraud is minor — they indicate that auditors partially corrected the room rate differential but the full package inflation embedded in the higher room category was still approved. The claim volume itself is the primary fraud signal here.

Key Findings

- Potential Entitlement Mismatches:** Volume of claims at major chains (Tata Memorial, Fortis, IVY Healthcare) highlights that patient class upgrades form a significant anomaly pattern requiring policy review.
- System Exposure:** A total of **6,414 claims** flagged under this pattern across FY 2021-2025.

PATTERN 3 (GHOST ADMISSION EXPOSURE)

GHOST ADMISSIONS EXPOSURE

Missing Hospital ID in BPA Portal

Description: Claims processed without any traceable Hospital ID (NULL / Ghost entries), completely hiding the billing source. These represent claims processed without standard portal validation controls.

29829787	GEN	GEN	₹3,875,331	₹3,875,331

Key Findings

- NULL Hospital ID Anomaly:** All 2,672,225 ghost claims have hospital_id = NULL, meaning these entities cannot be traced through any standard registry. The BPA portal must hard-reject submissions without a validated Hospital ID.
- Scale of Exposure:** Total ghost claims claimed amount: **₹20,119.21 Cr** — a massive conduit of untraceable leakage.

PATTERN 4 (BYPASS MECHANISM)

Non-Empanelled Hospital Funneling

Y-FLAG BYPASS

Description: Patients bypassing empanelled networks to receive treatment at non-empanelled facilities via the Y-Flag (emergency) route, ignoring CGHS rate caps entirely.

Note: Y-Flag records in source data do not carry a billed amount — only approved and deducted amounts are captured at settlement. Table sorted by claim volume.

Table 4.1 — Top Hospitals/Polyclinics by Y-Flag Volume (Top 15)

Hospital / Polyclinic Name	Bypass Claims	Net Approved (₹ Cr)	Deducted (₹ Cr)

Lodhi Road	864	₹12.08 Cr	₹11.59 Cr
LUCKNOW	857	₹10.50 Cr	₹7.28 Cr

Key Findings

- Polyclinic Dominance:** Top Y-Flag users are ECHS polyclinics (Noida, Delhi Cantt, Amritsar) — not private hospitals. This indicates that Y-Flag is being used for routine referrals, not genuine emergencies, defeating the entire purpose of the flag.
- System Exposure:** 70,388 claims bypassed standard empanelment via Y-Flag across FY 2021-2025.

PATTERN 5 (VERIFICATION FAILURE)

Unknown Hospital Status

U-FLAG MASS ANOMALY

Description: Hospital verification flag marked 'U' (Unknown/Unverified), allowing unchecked claim processing without mandatory BPA registry validation. These claims represent a systemic blind spot.

Note on NULLs: 0 of 14,222 U-Flag claims (0.0%) have no hospital name in the registry — these represent the deepest unresolvable blind spot and are tracked in aggregate below the table.

Table 5.1 — Top Hospitals/Polyclinics with Unverified Claims (Top 15)

Tumkur (Extension Counter Jalahalli)	285	₹0.15 Cr
Ara Bhojapur	270	₹0.15 Cr
Hamirpur (RC Yol)	240	₹0.37 Cr

Key Findings

- Blind Spot Exploitation:** Rewari leads with 971 unverified claims. A system-freeze on U-Flag claim processing pending hospital identity verification is immediately warranted.
- System Exposure:** 14,222 unverified claims processed without scrutiny across FY 2021-2025.

PATTERN 6 (IPD/OPD ESCALATION PATTERN)

IPD vs OPD Anomalies

IPD VS OPD REVERSAL TREND

Description: Hospitals where In-Patient Admissions (IPD) volumes are anomalously high, indicating OPD procedures are being artificially escalated to IPD admissions to claim room rent and higher package fees.

Table 6.1 — Top Hospitals with Suspicious IPD/OPD Reversal (Top 15)

INDUS SUPER SPECIALITY HOSPITAL - MOHALI	9,905	₹56.40 Cr	₹10.92 Cr	19.36%

Key Findings

- IPD Conversion Anomalies: The facility **NARAYANA VAISHNO DEVI SPE** leads this outlier category. The reversal of standard IPD/OPD ratios strongly indicates artificial escalation for room rent extraction.
- System Exposure: 1,228,652 suspicious IPD claims flagged across FY 2021-2025.

PATTERN 7 (CODE MANIPULATION)

Unlisted Procedure Loophole

THE NMI LOOPHOLE

Description: Hospitals billing procedures as 'Unlisted/NMI' to bypass fixed CGHS rates, allowing arbitrary billing at premium rates with no package ceiling enforcement.

Table 7.1 — Top Facilities Utilizing Unlisted NMI Codes (Top 15)

VIVEKANAND MEDICAL INSTITUTE	1,276	₹8.38 Cr	₹4.66 Cr	44.42%

Key Findings

- Rate Ceiling Bypass:** Medanta Gurgaon leads with 4,054 unlisted NMI claims — hospitals are exploiting unlisted codes to bill at arbitrary rates instead of adhering to CGHS package caps.
- System Exposure:** 91,009 unlisted procedure claims detected across FY 2021-2025.

PATTERN 8 (PRIOR APPROVAL INFLATION PATTERN)

Prior Approval vs Final Bill

THE BAIT & SWITCH (PA INFLATION)

Description: Hospitals securing a low Initial Estimate (Prior Approval) then submitting a massively inflated final bill post-admission. *Note: Records with initial estimates ≤ ₹100 (data entry errors) have been excluded from this analysis.*

Table 8.1 — Top Hospitals Inflating Final Bills vs Prior Approval (Top 15)

FORTIS ESCORTS HOSPITAL (A UNIT OF FHL & IHL)	5,241	₹26.15 Cr	₹112.15 Cr	₹99.53 Cr	329%

Key Findings

- Estimate Inflation:** The top anomalous facilities show final bills exceeding initial approvals by massive margins (often > 150%), indicating systematic 'Bait and Switch' post-admission billing tactics.
- System Exposure:** 622,325 inflated claims detected (after filtering data-entry error rows).

PATTERN 9 (BEHAVIORAL)

Artificially Delayed Discharge

STAY EXTENSION FARMING

Description: Hospitals artificially extending patient discharge dates to farm daily room rent and routine care charges beyond clinical necessity.

Key Findings

Bed Blocking at Scale: Park Hospital Gurgaon alone farmed 136,092 extra days across 6,375 claims — an average of 21.3 extra days per admission requires clinical review to determine whether the extended stays were medically justified.

System Exposure: 142,523 stay extension requests flagged across FY 2021-2025.

PATTERN 10 (SYSTEM BYPASS)

*False Medical Urgency***EMERGENCY GATEWAY BYPASS**

Description: Hospitals falsely declaring normal elective cases as 'Emergencies' to bypass referral ceilings, polyclinic wait times, and geographical restrictions.

⚠ Data Gap — FY 2021–2025 records not available in current extract

The Emergency Gateway (E-Flag) dataset currently extracted covers FY 2011–2020 only. A separate extraction targeting FY 2021–2025 is required to populate this pattern. This section will be updated once the FY 2021–2025 emergency bypass data is available from the ECHS database.

What to look for when data is available

E-Flag Volume Spike: Hospitals with disproportionately high emergency admission rates vs. their specialty profile warrant immediate audit.

Elective Diagnoses as Emergencies: Flag claims where admission_ailment indicates planned procedures (joint replacement, cataract, dental) but referral_type = 'E'.
