MODULE 11: IDENTITY FRAUD

ID Duplication | Simultaneous Admissions | Synthetic Identities

IIT KANPUR × ECHS DIRECTORATE

TOTAL FRAUD CASES

3,000 Flagged

FINANCIAL EXPOSURE

■796.67 Cr

PATTERNS ANALYZED

6 Critical Patterns

ANALYSIS PERIOD

Last 5 Years (2021-2026)

REPORT DATE

June 3, 2026

CLASSIFICATION

CONFIDENTIAL — OFFICIAL USE ONLY

EXECUTIVE SUMMARY

This report presents the comprehensive findings of the **Module 11: Identity Fraud Detection** analysis conducted on the ECHS production database covering **the last 5 years (2021-2026)**. The analysis examined **26+ million claim records** to identify systematic identity-related fraud patterns including duplicate identifiers, simultaneous admissions, synthetic identities, and coordinated fraud rings. **Six critical patterns** were analyzed with complete descriptive information for immediate action.

Metric	Value
Total Cases Flagged	3000, cases
Financial Exposure	■796.67 Cr
Patterns Analyzed	6 critical fraud patterns
Patterns with Data	6 patterns
Critical Severity	3 patterns
High Severity	3 patterns
Analysis Period	2021-2026 (5 years)
Data Completeness	100% - Full descriptive information

The analysis identified **3000 cases** requiring immediate investigation with an estimated financial exposure of **■796.67 Cr**. All flagged cases include complete descriptive information (hospital names, beneficiary details, patient demographics, claim amounts) enabling immediate action without additional database queries.

FRAUD PATTERNS DETECTED

PATTERN 01 Duplicate Card IDs		● CRITICAL
Description:	Single ECHS card used by multiple service numbers	
Cases Detected:	500 flagged cases	
PATTERN 02 Simultaneous Admissions		● CRITICAL
Description:	Same beneficiary at 2+ hospitals simultaneously	
Cases Detected:	500 flagged cases	
PATTERN 03 Duplicate Bill Numbers		● HIGH
Description:	Same bill number used multiple times	
Cases Detected:	500 flagged cases	
PATTERN 04 Mobile Number Rings		● HIGH
Description:	Single mobile linked to 5+ cards	
Cases Detected:	500 flagged cases	
PATTERN 05 UID Duplication		● CRITICAL
Description:	Same Aadhaar UID for multiple service numbers	
Cases Detected:	500 flagged cases	
PATTERN 08 High Frequency Claims		● HIGH
Description:	Beneficiaries with 10+ claims	
Cases Detected:	500 flagged cases	

P11-01

500 Cases Detected

Duplicate Card IDs — Critical Identity Fraud

Single ECHS card number used by multiple different service numbers. **500 cases detected** with complete hospital and beneficiary details. Top 15 cases by claimed amount shown below.

Card Number	Svc #s	Names	Claims	Hospitals	Total Claimed	Total Approved	Span (days)

Top 15 beneficiaries ranked by total claim count. Span = Days between first and last claim.

PRIORITY ACTION MATRIX

Priority 1: CRITICAL — Immediate Investigation Required

Pattern	Cases	Action Required
01. Duplicate Card IDs	500	Immediate audit and verification
02. Simultaneous Admissions	500	Immediate audit and verification
05. UID Duplication	500	Immediate audit and verification

Priority 2: HIGH — Prompt Review Required

Pattern	Cases	Action Required
03. Duplicate Bill Numbers	500	Review within 30 days
04. Mobile Number Rings	500	Review within 30 days
08. High Frequency Claims	500	Review within 30 days

RECOMMENDATIONS & NEXT STEPS

1. Establish dedicated fraud investigation team to review all CRITICAL priority cases
2. Implement real-time duplicate ID detection at claim submission stage
3. Cross-reference all flagged UUIDs with UIDAI for validation
4. Conduct hospital-level audits for facilities with multiple flagged cases
5. Implement biometric verification for high-value claims
6. Establish mobile number verification system for beneficiary registration
7. Deploy automated alerts for simultaneous admission attempts
8. Review and strengthen dependent age-eligibility validation rules
9. Initiate recovery proceedings for confirmed fraud cases
10. Share intelligence with law enforcement for criminal investigation

Important Notes:

- All flagged cases are **investigative leads** generated by automated analysis. Each case requires verification by qualified auditors before any action is taken.
- Complete descriptive information is included in all CSV data files to enable immediate investigation.
- Financial exposure figures are approximate based on claimed amounts. Actual fraud amounts may differ after detailed investigation.
